PROFILE

Dedicated and technically inclined BBIT candidate with a strong foundation in C, C++, and object-oriented programming. Known for a structured approach to problem-solving, a willingness to learn, and a commitment to quality work. Equipped with strong communication and collaboration skills, and eager to contribute to IT or software development teams through internships or freelance opportunities.

WORK EXPERIENCE

Projects

ATM Banking System (OOP - C++)

- Simulated ATM functionalities such as login, balance check, and withdrawal
- Used classes, constructors, and file handling for real-world logic

School Grading Sheet (MS Excel)

- Designed a grading system with automatic grade calculation
- Used formulas like IF, AVERAGE, VLOOKUP
- Helped teachers easily calculate and track student performance

Assignments & Reports (MS Word)

- Created academic assignments with professional formatting
- Inserted tables, headers/footers, and cover pages

Console Programs in C / C++

Wrote various mini-programs such as:

- Student record manager
- Calculator
- Loop-based patterns and logic problems
